

Patient Name: John Smith
Date of Test: April 26, 2023

Test Results:

Fasting Blood Sugar: 180 mg/dL (Normal range: 70-99 mg/dL)

Postprandial Blood Sugar (2 hours after meal): 220 mg/dL (Normal range: <140 mg/dL)

Note: Patient has consistently high blood sugar levels, which may indicate a condition such as diabetes or prediabetes. Further evaluation and management of blood sugar levels are recommended. Please follow up with a primary care physician or endocrinologist for further evaluation and treatment.
